

EcoTemp Lite

The EcoTemp Lite is a HVAC control unit designed for transportation use. It has a simple and easy to use layout, making it ideal for motor coaches and transit buses. The easy to read LED display shows temperature settings, blower

speed or error messages. The bus controller was designed as a programmable platform that could easily be expanded and customized. Several methods of compressor protection are available.

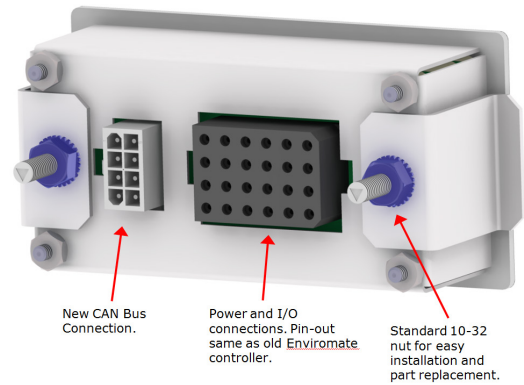

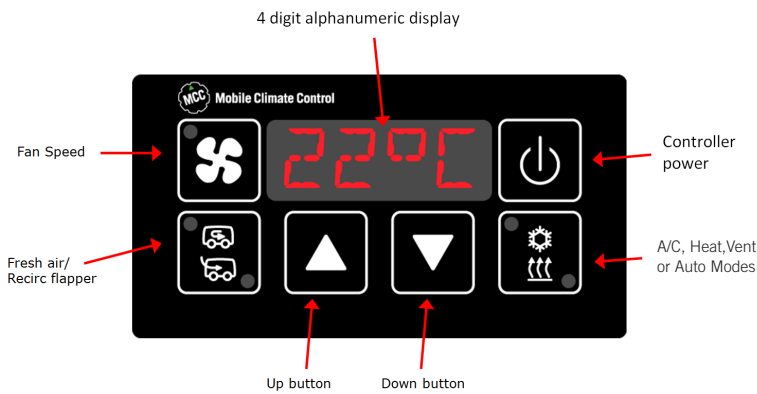

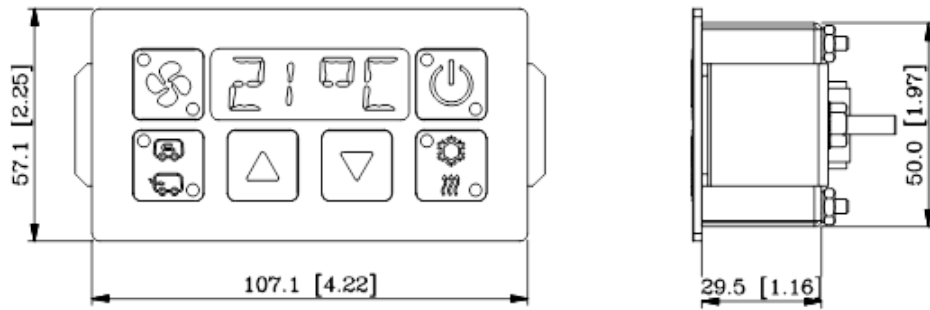

Features

- Simple layout
- Small foot print
- RS 485 and CAN BUS communication
- Adjustable parameters for customization
- Built-in diagnostics
- Easy software upgrade
- Optional coolview system monitoring software
- Easy to use and install

Benefits

- Large display and buttons. Less driver distraction
Keep driver's eyes on the road
- Takes up little space in dash board. Perfect for smaller size buses
- New feature! Allows easy and fast dignostics. Able to upgrade HVAC system software while vehicle is running
Less vehicle downtime
- Reduces maintenance, troubleshooting and minimise downtime
- Backlight display for night viewing

Technical Data

Operating Voltage	+9VDC to 32V DC
Operating Temperature	-40°C to 85 °C (-40°F to 185°F)
Inputs	5 Digital and 9 Analog
Outputs	10 High side, 1 Analog / PWM
Communication	RS-485 and CANBus (J1939)
