

VIII. Heaters

Heater **Whisper UW-9**

Very compact heater

Having the same profile as the UC-9 convector, MCC heater whisper UW-9 is the ideal wall mounted heater when extra heat output is required.

As a part of the UC-9 family, the UW-9 heater is compact, it is also highly customizable suitable for motor coaches

and transit buses. The unit consists of heat exchanger with configurable water connections, two speed fans.

The UC-9 can be also be used in as a standalone heating unit or in combination with other heaters and convectors. An electrostatic or mesh filter can also be added as an option.

Features

- Smooth air distribution
- Rugged design
- Suitable for sloping floors
- Flexible design (3-18 fans)
- Two speed long life fans
- Lightweight

Heater **Whisper 3C, 7C and 12C**

High performance heating system

The Whisper 3C, 7C and 12C heaters are units designed for high output.

Whisper 3C available only in 24V, 7C and 12C are available in 12V and 24V versions. Thanks to its modular

design, piping can be mounted on either left or right side for easy installation. 3C, 7C and 12C are electro- magnetic interference conformance (EMC) approved according to 72/245/EG including revision 2005/83/EG.

Whisper 3C

Whisper 7C & 12C

Features

Heater **Whisper K-200**

Economical Compact Heater

MCC Whisper K-200 compact heating unit is a part of the Whisper 200 family, its compact size means that it can be mounted anywhere. The whisper K-200 consists of a heat exchanger and four brushless fans (12VDC or 24VDC) with

long life bearings for quiet operation. All components are mounted in a rugged anodized aluminum case with integrated mounting bracket for simple installation.

Features

- Heater system for interior heating in buses with water/ glycol based heating systems
- Piping can be mounted either left or right side
- Smooth air distribution
- Compact and light weight design
- Long life brushless fans

Heater **Whisper 200/2-3-5 fans**

High performance with unique flexibility

The Whisper 200 family is a highly customizable wall mounted heating unit designed for motor coaches and buses. It consists of a coolant type heat exchanger with various fan configurations in 24V or 12V. The Whisper 200 can be customized in different configurations. with two to five fans and

front or rear water connections. It can be used as stand alone heating source or in combination with convectors.

The Whisper 200 is EMC approved according to directive 72/245/EEG including rev 2006/28/EG.

Features

- Heater blower system for buses with water/glycol based heating systems
- Smooth air distribution
- Whisper quiet operation
- Many configurations possible thanks to flexible design
- Long life two speed fans
- Low weight

Compact Under-Seat Heater T12-12801

Robust, Light-weight and Cost Competitive Heater

Compact under-seat heater with all aluminum heater core designed for low pressure and low coolant flow, suited for all climates and vehicles.

Can be filled as a stand alone unit for multiple placements.
This low cost multi-functional heater will suit all budgets.

Features

- Simple compact design
- All aluminum heater core
- Single or multi-pack use
- Available in 12 and 24 vdc
- Connection in minutes
- Brush or brushless motors

Benefits

- Light-weight
- Adapts to any application
- Many configurations possible due to flexible design
- Simple installation
- Low cost

Technical Data

Heating capacity @ max	45000 Btu/hr (13kW)	50000 BTU/hr option with higher output motor

Electric DC Voltage Heater

PTC heating element with MCC electronic temperature stabilization and safety control

This newly designed mini electric heater with fully integrated controls can be used where space is at a premium. Small and economical, but powerful for its size, it is perfect for electrically powered compact cabins, forklifts, mini

construction equipment, or as an aftermarket replacement. Simple and easy to instal, all that is needed is an electrical connection and a power supply. The heater casing is made of durable powder coated metal to withstand rigors of daily use.

Features

- Compact design with low weight
- High efficiency and quiet operation
- Integrated speed and temperature control
- Four direction airflow louvers
- Flexible mounting for bottom or side
- No maintenance other than filter cleaning
- Easy access and reusable filter
- Industry leading power management
- MCC optimized electronic controller
- CAN (J1939) capability

Features

This powerful version of the popular #212 family of heaters is specifically designed for the corrosive ocean environment. Coil is made of copper with stainless steel (SS) end plates. Hardware and casing are made of SS as well. Engineering plastics are used for hose adapters and blower. Details of the blower can be found in the blower section. Hose adapters make the heater suitable for ducting to windshields etc. Switch for 3 speed operation, wiring harness and knob are included.
